CADTH Reimbursement Review
Feedback on Draft Recommendation

Instructions for Stakeholders

This template is for eligible stakeholders to provide feedback and comments on draft reimbursement recommendations. Draft recommendations are available for feedback for 10 business days.

CADTH will only consider feedback received from eligible stakeholders, including the sponsor, patient groups, clinician groups, and the participating drug programs. Individuals interested in providing feedback should contact the relevant patient and clinician organizations. This template may also be used by eligible industry stakeholders to provide feedback on draft recommendations from the non-sponsored review process (i.e., any current or future Drug Identification Number [DIN] holders for the drug under review).

The sponsor may use this form to provide general feedback on the draft recommendation if they are not filing a request for reconsideration. If the sponsor is filing a request for reconsideration, they must complete the reconsideration template and should not complete this template.

All submitted feedback must be disclosable and will be posted on the CADTH website.

If you have questions, please email requests@cadth.ca with the complete details of your question(s).

Before Completing the Template:

Please review the following documents to ensure an understanding of CADTH's procedures:

- Procedures for CADTH Reimbursement Reviews
- Procedures for Non-sponsored Reimbursement Reviews
- CADTH Pharmaceutical Review Updates for any applicable information.

Completing the Template:

Feedback should be presented clearly and succinctly in point form, whenever possible. The issue(s) should be clearly stated and specific reference must be made to the section of the recommendation document under discussion (i.e., page number, section title, and paragraph).

Comments should be restricted to the content of the draft recommendation and should not contain any language that could be considered disrespectful, inflammatory or could be found to violate applicable defamation law.

Feedback must be based on the information that was considered by the expert committee in making the draft recommendation. No new evidence will be considered at this part of the review process.

Feedback must not exceed 3 pages in length, using a minimum 11-point font on 8.5″ by 11″ paper. If comments exceed 3 pages, the feedback will not be accepted by CADTH. References may be provided separately; however, these cannot be related to new evidence.

Patient groups must complete Appendix 1.

Clinician groups must complete Appendix 2.

Filing the Completed Template:

The feedback must be provided in Microsoft Word format by using the *Submit* link next to the drug on the Open Calls page. In order to ensure fairness in CADTH's procedures, all stakeholder feedback must be received by the deadline posted on the CADTH website.

Stakeholder agreement with the draft recommendation		
1. Does the stakeholder agree with the committee's recommendation.	Yes	☒
	No	☐
Please explain why the stakeholder agrees or disagrees with the draft recommendation. Whenever possible, please identify the specific text from the recommendation and rationale. The recommendation to reimburse faricimab for DME is welcomed as it provides another treatment option to patients. Importantly, faricimab may allow patients to reduce the number of treatments, which would have large impacts of their quality of life as well as reducing the risk of treatment related side effects. This is to be commended. Reducing the treatment burden is important in any patient population, but perhaps even more so in the case of DME. Individuals with DME are often dealing with multiple health conditions and co-morbidities. There is also less access and uptake of diabetic eye care among some of the most underserved populations. This has been demonstrated in the case of diabetic eye screening, where lower income, recent immigration status, mental health history or those without a primary care provider were at higher risk of not accessing eye screening (https://pubmed.ncbi.nlm.nih.gov/35577027/). These trends are likely to also impact treatment adherence and outcomes. These demographic factors make having an effective treatment that required fewer visits even more crucial for the target population and could dramatically reduce patients stopping or missing treatments thus improving health outcomes.		

Expert committee consideration of the stakeholder input		
2. Does the recommendation demonstrate that the committee has considered the stakeholder input that your organization provided to CADTH?	Yes	☒
	No	☐
If not, what aspects are missing from the draft recommendation?
